TUESDAY, June 3—P.M.

In the Stock market there is generally not much activity, but with a few exceptions, the quotations are sustained. Reading is as quiet to the inactivity, the sales of the day reaching 10,000 shares, of which 5,000 shares were at the Second Board, closing at 59¢, an improvement of 4¢ cent on yesterday's prices. Harlem was also firm, closing at 76. The extension of this road is progressing vigorously, and about ten miles to America will be opened in the course of two weeks. The receipts of May are not yet made up, but they will probably show over \$11,000 gain on May of last year. Long Island was at the Second Board, 21¢ bid. The receipts show a fair increase in May, which would have been larger, but for the interruption to the freight business, occasioned by the repairs going on the Road. Farmers' improved to 71. Erie fell off to 85, and afterward closed firm at 86. Hudson River declined 4. Canton was firm. Government Stocks show a further advance. Sles, 1867, selling at 116. State Stocks generally are firm.

The Exchange market is very firm for first class bills, but other descriptions are unsalable. Sterling, 101/10@104; Frances, 5.10@5.07%; Amsterdam, 41/2@411; Bremen, 79@79; Hamburg, 36@36.

Frights are firm, but not very active. Cotton has been engaged at 4d, which is an advance; 50 bbls Flord, 15d; Corn, 4d; 100 tcs Soda Cake and 300 bbls Lard, 12d 6d. To have the packet is full at previous rates. A deal freight, from China to London, was made at £4 5s. To California there is a moderate business doing at 55@70¢ per foot.

The report of the shipments of Coin by the steamer to-day vary from \$1,000,000 to \$1,200,000. The large arrivals from California, however, by the North America and Empire City have destroyed all the effect of these large shipments, on the street. At the lowest estimate the two steamers have \$2,500,000 on board, which amply supplies the vacuum made by the heavy shipments. The export per Washington, it is understood, supplies the needs for the Continent for the present. The quotations are:

Value.

Amer gold, old, 100@106 Carolean dollars, .97 46

Amer gold, new, 100@106 Five francs, .97 46

Half dollars, 102@102 Doubloons, 17.30@17.40

Portuguese gold, 102@102 Doubloons, 16.25@16.40

Spanish quarters, 100@102 Sov's, light, 4.81@4.86

Mexican dollars, 104@104 Heavy guineas, 5.08@5.16

Spanish quarters, 101@102 Naples, 3.36@3.38

The advices from California, both by the newspapers and by private letters, are more favorable than have been received for sometime past. The yield of gold seems to be increasing, and new discoveries are daily making fully equal in richness to those of the earliest deposits. The advice in regard to the auriferous quartz are in some cases of an astounding character, and it would appear that the riches of California are yet scarcely beginning to be developed. The general estimate of the yield of gold for the year is one hundred millions of dollars, and the most prudent do not place it below sixty millions. California certainly promises to continue to grow gold quite equal in amount to what we have heretofore received.

In the Money Market there is no change to note but a continuance of an abundant supply and low rates. The Banks have money for all their wants and find it difficult to place their balances on call at present rates. First class short paper goes at 56@57 cent, long 60@61 cent. On call the market is 55@56 cent, with occasional loan lower.

The Clothing trade has been buying more freely this week, which has relieved a little the languor of the Woolen Cloth market, and a fair export demand has sprung up for Cottons, stimulated by the low ruling prices. The activity, however, does not benefit prices, which are below cost. Bleached and unbleached Shirts and Sheetings have been dull for home consumption, but a slight demand exists for export. Prices, however, are heavy, as the stock still remains large. Drills are in like manner quiet for home use, but with some inquiry for export, limited, however, to Browns. Osnaburgh are quiet, without change in price. Denims command some inquiry, and prices are steady. Stripes are offered freely by holders, who want to realize, but the market drags. Ticks are heavy in price and in stock. Cotton Flannels are in limited request and steady. Printing Cloths are inactive. Prints are quiet, except some small orders for shipping, prices seem more steady. Ginghams are firm, with a moderate demand. Lawns are still active and firm. Cotton Pantaloony is heavy, holders wishing to realize. A few shipments are making. De Laines are out of season, and Fall styles engage the attention of manufacturers. These goods will be abundant in the Autumn and threaten to rule low.

Cloths are heavy, though a few purchases are making by clothiers. Cassimeres are dull and prices nominal. Satinets, with a large stock, are dull and heavy, with a slight demand for shipping. Tweeds and Jeans are dull. Linseys are declining: the demand is light and below the supply. Sheeps Grays are firm with a moderate demand. Fannels and Blankets are dull. In imported goods there is a moderate business doing, large for the season. Low grades of Cloths are in demand. Lawns, both English and French, are active at good prices. Linens are dull. Dundee Goods continue heavy. Clothiers are buying Beavers, Folds and Serges. Other British goods are dull, and prices generally are depressed. French and Continental Goods show a great depression in price. The auction sales still linger, without exciting any animation of demand. Individuals must suffer largely owing to the turn which the market has taken from an over supply of both domestic and foreign goods, but the sacrifice of price will benefit the country at large. Consumption has been stimulated by the low prices. The loss of the few will be the gain of the many, and so large a distribution of goods throughout the extent of the States shows a general prosperity which is cheering amid the cry of difficulty which the Trade put forth. The course of prices is downward. Cotton, Wool and Silk are all falling.

The receipts of the Long Island Railroad in May were:

4,599 95

Freight, 9,765 67

Passenger, 788 31

Commutation, 15,147 94

May, 1850. Increase, 14,197 53

\$300 41

The freight business has been much interrupted by the repairs on the Jamaica Road and the transportation of the Company's own material.

The principal and interest of the \$500 Income Bonds of the Columbus and Lake Erie Road, due on the 1st June, will be paid at the office of Messrs. Delano, Dunlevy & Co., 39 Wall-st.

The great enterprise of the Illinois Ce-

trial Railroad has been at last fairly commenced. The Directors voted, to-day, to put One Hundred and Fifty miles of the Chicago end at once under contract. Other divisions will soon be arranged, and in the course of four or five years we shall see this great work completed from Chicago and Galena to Cairo.

The North American Fire Insurance Co. have declared a dividend of five 4¢ cent.

The following is the Treasurer's weekly statement, showing the amount at his credit in the Treasury, with Assistant Treasurers and designated Deposaries, and in the Mint and Branches, by returns received to Monday, 26th May, 1851, the amount for which drafts have been issued, but were then unpaid, and the amount then remaining subject to draft. Showing, also, the amount of future transfers to and from depositaries, as ordered by the Secretary of the Treasury:

In what place Amount on Old drafts Amount

deposit, not yet subject to draft.
